Loudoun County Announces First “Presumptive Positive” Case of COVID-19

The Loudoun County Health Department announced that one resident tested “presumptive positive” for coronavirus disease 2019 (COVID-19). “Presumptive positive” means that the individual has tested positive at the state level, but those results must be confirmed by the Centers for Disease Control and Prevention (CDC).

The individual is a resident of Loudoun County who is in their 40s and is believed to have come in contact with a reported case of COVID-19 while attending Christ Church, Georgetown in Washington, D.C. This resident was brought to the attention of the Loudoun County Health Department early Tuesday morning following testing for the novel coronavirus by the Division of Consolidated Laboratory Services in Richmond. The patient is currently doing well and is self-isolating at home.

“We know the risk of coronavirus disease—or COVID-19—increases among close contacts of infected persons,” said Loudoun County Health Department Director David Goodfriend, MD, MPH. “In this case, based on the results of our contact investigation to date, the risk to the general Loudoun community remains low.”

“We anticipated that a case of COVID-19 would be diagnosed in our community at some point,” said Board of Supervisors Chair Phyllis J. Randall. “It is important that we all follow the prevention guidance issued by the CDC to help limit the spread of the coronavirus.”

Symptoms and Prevention Tips

The coronavirus that causes COVID-19 can cause mild to more severe respiratory illness. In a small proportion of patients, COVID-19 can cause death, particularly among those who are older or who have chronic medical conditions. Symptoms include fever, cough, and difficulty breathing. Symptoms appear within 14 days of being exposed to an infectious person. COVID-19 spreads primarily through respiratory droplets produced when an infected person coughs or sneezes.

To lower the risk of respiratory germ spread, including COVID-19, the Virginia Department of Health encourages the following effective behaviors:

- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer only if soap and water are not available.
- Avoid touching your eyes, nose, and mouth.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing.
- Clean and disinfect frequently touched objects and surfaces.
- Stay home when you are sick.
- Avoid contact with sick people.
- Avoid non-essential travel.

News Conference

Loudoun County officials held a news conference concerning COVID-19 today, Tuesday, March 10, 2020, at 1:30 p.m. in the Board Room of the Loudoun County Government Center, 1 Harrison Street SE in Leesburg. Members of the Board of Supervisors and the Loudoun County Health Director were on hand.
