

County Projects by Election District

The Board of Supervisors adopted the LT-Revised 1 Redistricting Plan on June 7, 2022. The adoption approves Amendments to the Codified Ordinances of Loudoun County, Chapter 207- Election Districts and implements the LT Revised 1 Redistricting Plan. The Virginia Attorney General’s Office asserted a “certification of no objection,” meaning the County may implement its new election districts as adopted by the Board. The certification is required by state law. The table below lists both County capital projects and County-supported or managed transportation projects funded in the current six-year funding plan by 2011 Election District, including information on the new 2022 Election District and Functional Area. Excluded from this list are projects that either do not have a location by their nature, such as those in the Administrative and Information Technology functional areas; those that fund the procurement of large assets, such as the Fire Apparatus and Transit Bus projects; or School projects.
